

## Acentiss GmbH

ACENTISS GmbH is a wholly owned subsidiary of IABG mbH with headquarters in Ottobrunn near Munich, with a branch office in the Stuttgart area established in 2015. ACENTISS GmbH assists its customers in every phase of a product's lifecycle in the fields of aerospace, automotive and medical engineering. It also provides consulting services to help establish development and production processes for their products.

We are recognized partners in the aviation industry when it comes to comprehensive aircraft design (CS-22 & CS-23), modification and operation of RPAS/UAS, construction design, static-dynamic calculations and fatigue limits (composites, metals), avionics design, electrical actuators, and approvals. In addition, we develop hard and software for safety-critical components and analyze functional safety measures. Our experts have many years of experience in the area of (interim) project management to support your successful realization of your ideas.
