

Elmako GmbH & Co. KG

ELMAKO is one of a few companies that meet all of the standards and comply with all regulations and requirements that apply to the aerospace, defence, mechanical engineering, and medical engineering industries world-wide. The company develops and produces individual and serial parts or complete assembly groups and realizes custom projects in a timely manner and of the highest quality.

Established in 1972, the company offers smart solutions – the full range of services under one roof, from development to design, production, and delivery. Every product undergoes appropriate testing procedures. We are a renowned supplier in our fields and globally operating groups appreciate our competencies in finding the right solutions, quality assurance, precision, and delivery performance.
