

HENSOLDT Avionics GmbH

HENSOLDT Avionics is a leading manufacturer of situational awareness and mission management systems. The company develops, produces and markets certified avionics systems that can be connected to a wide range of avionics and sensor systems from other manufacturers. The high-end products are used worldwide and are characterised by their flexibility and modular concept. Many EMS, SAR, offshore, military and paramilitary operators have been relying on HENSOLDT avionics systems for years. Our customer base includes aircraft OEMs, system integrators and operators from all over the world. With almost 30 years of expertise and certified products, HENSOLDT Avionics is a proven and reliable partner for your missions.
