

Ziegler GmbH Feinwerktechnik

Our clientele consists of leading companies in the aerospace, automotive and mechanical engineering industries, which we supply with complex parts and subassemblies.

Sophisticated turned and milled parts – entire units – supply of complete systems.

As a long-standing supplier to the aerospace industry, we offer the highest level of expertise in machining, especially of high-strength materials and special materials. Our range of services includes: Turning, milling, precision deburring and assembly as well as advising the design department on production-related issues. Non-destructive tests, heat treatments and surface treatments are commissioned from subcontractors so that we can supply you with ready-to-install parts.

We guarantee the highest quality standards by complying with ISO 9001:2000, QSF-B/ASD EASE/AECMA EASE, EN 9100 Aerospace and all supplier audits.

Our strengths:

- Unique production know-how
- Fully certified, experienced management of all aspects of the production process
- Close familiarity with the highest quality specifications

Our range of services:

- Machining of all materials, especially those which are hard to cut
- Complete machining of single and serial parts
- 5-sided milling of workpieces up to \varnothing 1,000 x 1,300 x 800 mm
- Lathe machining of workpieces up to \varnothing 500 mm
- Advice on low-cost production processes during the design process
- Advice on potential savings during ongoing series production
